

# Take your best SHOT!

Want improved die casting productivity? Then you need NGK Plunger Tips !

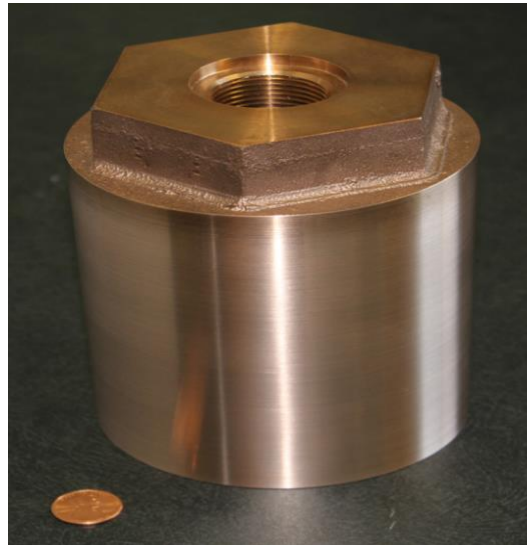

NGK Metals utilizes “best in class” casting methods coupled with the highest quality raw material to pour the perfect plunger tip.

NGK’s CNC Machining Center capabilities will produce a finished plunger tip ready for immediate use in your die casting operation.

With NGK Metal’s proven proprietary processes, you will reduce maintenance costs and improve cycle time with:

1. Better Heat Transfer.
2. Improved Wear Resistance.
3. Minimal molten metal adhesion.

**NGK Quality Plunger Tips = MORE SHOTS!**
